

Implementation Support for the Paris Agreement

www.unique-landuse.de

The Paris Agreement defines the global goal of increasing resilience to climate change, without jeopardizing the global development agenda. GIZ's Support Project for the Implementation of the Paris Agreement (SPA) strengthens the capacities of partner countries to successfully implement climate policy, reduce greenhouse gases, increase resilience and thus contribute to the Paris Agreement's objectives. UNIQUE supported the SPA adaptation component to strengthen narratives for international climate negotiations, and support the effective implementation climate adaptation projects within the framework of the International Climate Fund (IKI) and other national and international initiatives. The aim of the project was the elaboration of good practices, as well as the provision of advisory services, and backstopping support for the adaptation component.

Country

worldwide

Duration

05/2018 - 09/2018

Client

Deutsche Gesellschaft für
Internationale
Zusammenarbeit (GIZ)

Our contribution

- Advising and backstopping on adaptation financing and private sector engagement.
- Organizing a workshop on sustainable land management, climate change adaptation and mitigation.
- Elaboration of adaptation topics on sustainable land management, urban-rural interactions and food security.
