

M&E System Development for NARIGP Kenya

www.unique-landuse.de

The National Agricultural and Rural Inclusive Growth Project is a USD 220 million World Bank-funded investment project implemented by the Kenyan Ministry of Agriculture Livestock and Fisheries (MOALF). The project development objective is to increase agricultural productivity and profitability in targeted rural communities in selected counties. The project has four components: (i) supporting community-driven development; (ii) strengthening producer organizations and value chain development; (iii) supporting county community-led development; (iv) project coordination and management. UNIQUE was contracted to develop a comprehensive Monitoring and Evaluation (M&E) system for the project. The services included the development of Information and Communication Technologies (ICT)-based formats for data collection and analysis.

Country

Kenya

Duration

02/2020 - 03/2020
