

Project progress review Forestry Program Vietnam

www.unique-landuse.de

The Program for “Promotion of sustainable natural forest management, trade & marketing of forest products” is executed by the Vietnamese Ministry of Agriculture and Rural Development (MARD) and the German International Cooperation (GIZ) and consists of three components: (i) Sustainable Forest Management, (ii) Trade and Marketing and (iii) Forest Policy. A regular PPR-mission was carried out to review the achievements of the ongoing second phase and to provide recommendations for the third phase of the program. UNIQUE provided expertise in sustainable forest management and forest certification, processing, trade and marketing of forest products. Special emphasis was placed on a better linkage between the program’s components and on realistic planning of the third and last phase of the program.

Country

Vietnam

Duration

01/2011 - 02/2011

Client

Deutsche Gesellschaft für
Internationale
Zusammenarbeit (GIZ)

Our contribution

- Special emphasis was given to a better linkage between the program’s components.
- Realistic planning of the third and last phase of the program.
