

Support to the National Forest Programme

www.unique-landuse.de

Through the Programme d'appui au Programme Sectoriel Forêts et Environnement (ProPSFE), the GIZ supports Cameroon improving natural resource management. In collaboration with the Ministry of Forest (MINFOF) and the Ministry of Environment (MINEPDED), the ProPSFE aims to achieve sustainable natural resource management by involving different groups with stakes in the forest, including private sector, civil society and local communities. From 2011-2014, the ProPSFE has a climate component, where the main goal is to establish the legal and institutional frameworks for the implementation of a national climate strategy and REDD+ mechanisms. UNIQUE provided regular backstopping and periodic in-country missions to support the implementation of the program with a pool of short-term experts.

Country

Cameroon

Duration

08/2011 - 12/2015

Client

Deutsche Gesellschaft für
Internationale
Zusammenarbeit (GIZ)

Our contribution

- Expertise in climate policy related to forest and land use.
- Support mobilization of climate finance in the forest and environment sectors.
- Provide specific expert inputs on Free, Prior and Informed Consent (FPIC) for REDD+.
- Institutional training and professional development for Ministry staff.
- Organization of educational exchanges within West Africa and Europe.
- Provide recommendations for PSFE implementation.
